This week brought several good blog entries including discussions of the pros and cons of downgrading the JVM.

In a related matter, I gather up dozens of great blog entries every week just to post five picks. Maybe I should provide links to the others somewhere as well?

- [ColdFusion 8 Random Slowness? Downgrade the JVM!](#) ([Mark Mazelin](#), February 4)
- [Don't have a blog? Have something to say? Read This!](#) ([Dan Wilson](#), February 4)
- [SQL Tricks: What's an Upsert?](#) ([Cutter](#), February 4)
- [Details of Tuning A ColdSpring, Model Glue, Reactor Application On ColdFusion 8](#) ([Mike Brunt](#), February 6)
- [Ask a Jedi: Custom Tags, OnRequestStart, UDFs, and Antimatter Engines](#) ([Ray Camden](#), February 7)
