I just saw an announcement that a [book on CSS Zen Garden](#) has been released. For those of you that don't know, [CSS Zen Garden](#) is a very nifty site that can be viewed in several different designs (568 at the time of this writing). All of the designs use the exact same HTML, only the CSS changes. If you haven't been to the site before, I highly recommend you take a look.

The book is written by the founder of CSS Zen Garden, [Dave Shea](#) and by popular author, instructor and web designer, [Molly E. Holzschlag](#). Dave Shea has some [pictures of the book](#) on his site. [Digital Web](#) has a good [review of the book](#).
