I don't know what got in the water this week, but the selection of blog entries was amazing. It was really hard to pick just five.

The easiest pick, however, was Charlie Arehart's entry on CF411. Although this is really a renaming of existing resources, it is still a tremendously valuable resource for any ColdFusion programmer.

- [Announcing CF411.com: your place to find the 411 on things related to CF](#) (Charlie Arehart, September 3)
- [Virtual Sites and "Host Headers" Explained](#) (Mark Kruger, September 4)
- [Use Subqueries - they are fast!](#) (John Whish, September 5)
- [Converting A Base64 Value Back Into A String Using ColdFusion](#) (Ben Nadel, September 5)
- [DataBase Performance - Critical Hardware Configuration Tips](#) (Mike Brunt, September 5)
