This week has had a tone of great entries, it was really hard to whittle them down to five. The big take-aways from the week: Use unit testing and cfqueryparam.

- [Cftransaction Explained](#) (Gary Gilbert, July 15)
- [Coldfusion Database Basics](#) (Gary Gilbert, July 16)
- [Understanding the various XML files in CF and JRun](#) (Charlie Arehart, July 16)
- [Ask Ben: Rendering Javascript Line Breaks](#) (Ben Nadel, July 17)
- [SQL Injection Part II \(Make Sure You Are Sitting Down\)](#) (Mark Kruger, July 18)
