No doubt about it, the release of Flex 3 and especially of Adobe AIR 1.0 dominated the news this week. As such, I have a bonus 5 posts about AIR in addition to my five normal picks (with no AIR).

ColdFusion (without AIR)

- **CFCHART: Passing Additional Value in URL Other Than the 3 Standard Values** (**Christopher Wigginton**, February 25)
- **CFModule Works With Non-CFM Files** (**Ben Nadel**, February 26)
- **ColdFusion DSNless connection to a database** (**Fusion-Team**, February 27)
- **Coldfusion possible Leap Year bug** (**flatpackedworld**, February 28)
- **Implicit Array And Structure Creation Revisited** (**Ben Forta**, February 29)

AIR

- **AIR Support?** (**Ray Camden**, February 25)
- **Adobe AIR Tutorial for HTML / JavaScript Developers** (**Pete Freitag**, February 25)
- **Simple Drag and Drop into AIR** (**Rich Tretola**, February 25)
- **Managing Adobe AIR updates with ColdFusion 8** (**David Tucker**, February 26)
- **SQLite Admin for AIR 1.0** (**Christophe Coenraets**, February 26)
