The big event this week was easily Adobe Max (and the announcement of ColdFusion IDE - Bolt). Even with Max, however, this week still has a great selection of ColdFusion-related blog entries.

- **Hurdles For ColdFusion Hosting Providers** (**Steve "Cutter" Blades**, November 17)
- **Show the execution time of any query in ColdFusion 8** (**Dan Switzer**, November 17)
- **Can Performance Suffer With Cfqueryparam?** (**Mark Kruger**, November 18)
- **Comprehensive ColdFusion Component OnMissingMethod() Testing** (**Ben Nadel**, November 19)
- **Article at InfoQ published: Debunking Common Myths about ColdFusion** (**Raymond Camden**, November 19)
