Another week where great posts had to be sacrificed to get down to the limit of five entries. As a bonus, however, a selection of posts about cf.Objective() including some passionate discussions about the future of ColdFusion. See why you don't want to miss cf.Objective() next year!

- **A case study of performance optimisation (Simon Wright**, May 5)
- **CFDirectory Filtering Uses Single Character Wild Card (Ben Nadel**, May 7)
- **Getting the URL/web folder path in ColdFusion (Dan G. Switzer, II**, May 8)
- **What makes a good site search? (Simon Wright**, May 8)
- **A Question of Speed (Gary Gilbert**, May 9)

Bonus: cf.Objective()

- **cf.Objective() 2008: Walking Among Giants (Ben Nadel**, May 5)
- **Post cfObjective decompression (Chris Scott**, May 5)
- **Reflections on cf.Objective() (Brian Swartzfager**, May 6)
- **cf.Objective() 2008 and the Future of ColdFusion (Brian Kotek**, May 6)
- **Overall review of cf.Objective() and thoughts on OpenBD and the CF9 BOF (Brian Meloche**, May 10)
